

Your Smart Home & Business Automation Partner

ABOUT Pi

At Pi, we specialise in the design and installation of smart solutions for your home and workplace. Using the latest technology to create enhanced living and work spaces, whether it's an apartment, villa or a commercial space we will design a solution tailored to your needs.

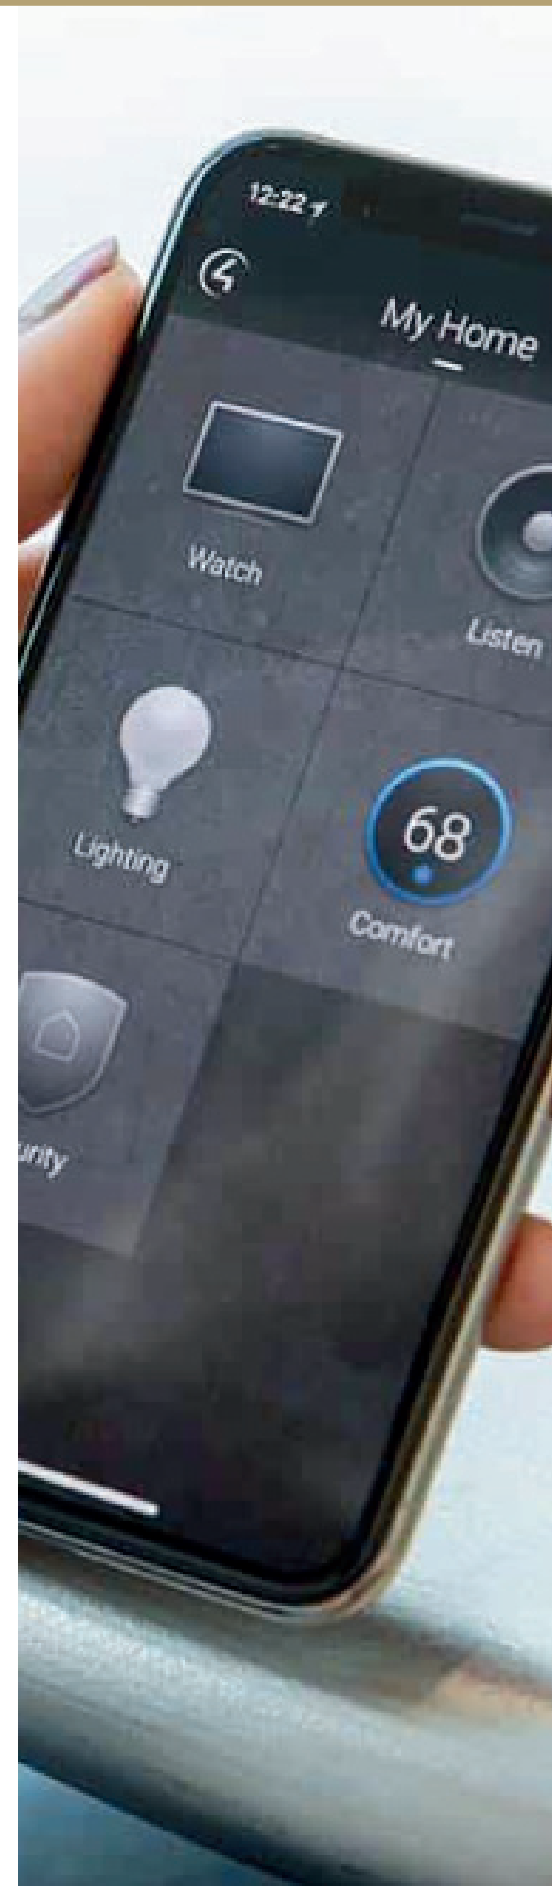

With many decades of experience in designing and implementing smart systems in the UAE, across the region and beyond, our team are passionate about creating the finest Smart Solutions that are right for you.

HOME AUTOMATION

Home automation simplifies the control of devices in your home onto a single platform. Combining lighting, AC, Music and Video, allowing them to be easily accessed via a touchscreen, smart remote or mobile app giving you total control at your fingertips.

With additional automation options including security, entry and shading you can enjoy the ultimate control with a bespoke solution tailored to your needs.

LIGHTING

Lighting is an integral element to the design of any home and will enhance the look and feel of any space.

Smart home technology allows you to connect the lighting throughout your home to a central control system, providing total functionality and control, from ambient scenes to programmable lighting settings at your fingertips.

CURTAINS AND SHADES

Window shading can be easily programmed to open and wake you up at the desired time in the morning, then close after sunset either automatically or at the touch of a button.

CLIMATE

Create the perfect living environment in all zones throughout your home with centralised temperature control at the touch of a button.

HOME SECURITY

Integrate a CCTV system into your smart home and feel safe knowing your home is secure from wherever you are in the world. Access control will allow access to your home remotely from your mobile or with fingerprint or pin code entry.

MULTI ROOM MUSIC & MEDIA

- Experience the joy of playing your favorite music and video content throughout your home at the touch of a button.
- Integrate your favorite media platforms making them available to enjoy wherever you like.
- From discreet or invisible speakers to high-fidelity audio rooms and entertainment centres, we are experts in all things AV.

HOME CINEMA

- From upgrading your existing family room to designing and creating the ultimate home cinema let us build you a tailormade solution, giving you the ultimate experience to enjoy in your home.
- Our designers will work with you to create the perfect space blending audio, visual and lighting to perfection with the option of adding luxurious bespoke interiors to further enhance your experience.

“A Home Cinema is more than just a big screen, it should be a place of comfort and escape where you can immerse yourself in your content of choice”

SMART BUSINESS AUTOMATION

- Increase productivity with Pi Business Automation Solutions
- Designed to create efficiencies and reduce costs for your business
- Pi business experts design, engineer, and deploy state of the art smart technology systems
- Achieve and surpass your business goals through the use of technology

COMMERCIAL AV SOLUTIONS

No matter what size your boardroom or meeting room you need exceptional audio and video quality that helps you see and hear clearly. Seamless content sharing makes collaboration possible wherever your team is.

Meeting Rooms
